

## PowerPIN™ STRUCTURAL STEEL

### Specifications

|                       |                             |
|-----------------------|-----------------------------|
| Material              | 1060 Carbon Steel           |
| Finish                | .0002                       |
| Head Diameter         | .313                        |
| Shank Diameter        | .128/.145                   |
| Length                |                             |
| 5323HPST              | 1-1/4"                      |
| 5383HPST              | 1-1/2"                      |
| 5503HPST              | 2"                          |
| Point Style           | Ballistic                   |
| Tensile               |                             |
| Withdrawal (steel)    |                             |
| Withdrawal (concrete) |                             |
| Recommended Tools     | 400 PSI High Pressure Tools |

### Applications

- † Plywood to Structural Steel up to 1/4" thick
- † 2x4 to Structural Steel up to 1/4" thick
- † Cement Fiber Board to Structural Steel up to 1/4" thick
- † Cold-Formed Steel to Structural Steel up to 1/4" thick
